The mLINE, offers a unique combination of novel & patented features for mechanical pipetting. The mLINE pipettor family is designed to meet the strictest performance, ergonomic and safety criteria, and its attractive design gives the pipettor its final touch. The mLINE pipettors are steady yet light in weight, and feature very low tip ejection and pipetting forces, which is made possible through patented technology. The mLINE pipettors cover the full volume range of 0.5 - 5000 µl.

Biohit eLINE electronic pipettors offer the latest technology and innovation in hand held liquid handling. The eLINE electronic pipettor has been designed to deliver the highest levels of analytical accuracy with minimal effort. The attractive and ergonomic design of the eLINE pipettors together with the fully electronic operation - including electronic tip ejection - take the effort out of pipetting and make the eLINE the ultimate choice for every laboratory. The eLINE pipettors cover the full volume range of 0.2 to 5000 µl.

The Economic and Ecologic Tip Refill System

- The New Refill System from Biohit is environmentally friendly with the packaging completely recyclable.
- The tip trays are easily transferred from a space-saving tower or twin-pack Refill System to the tip boxes.
- The Refill System range covers the five most popular tip sizes.

New Tip Boxes

- The new rigid and strong polypropylene boxes and trays are fully autoclavable.
- The tray holds 96 highest grade non-wettable virgin polypropylene tips in a 8 x 12 microplate format.
- The new flip-top boxes are single-handed operated for opening and closing. Refill trays snap securely into boxes.
- The color coding of the tip trays allow immediate tip volume recognition.
- Available as non-sterile or pre-sterilized.
